DVDPROJECT - COMPLETE FINE-TUNING & ADJUSTMENT GUIDE

Scene: Assets/Scenes/01Day.unity | All 3 Upgrade Paths (11 Tiers Each) + 6 Remote Minigames

HOW TO AUTO-APPLY SCENE SETUP: In Unity, click Tools -> Setup Gameplay Overhaul (or Tools -> Run Complete Setup).

1. SOUNDS & AUDIO CLIPS (WHERE TO CHANGE EVERY SOUND IN THE GAME)

All audio clips and volume sliders are exposed on the following GameObjects in 01Day.unity:

1.1 DVDLogoBouncer (Hierarchy: DVDSetup/Camera/DVDLogo)

* audioSource (AudioSource): Main SFX speaker for DVD bounces, direct hits, and popups.
* edgeHitSound (AudioClip): Played when any DVD logo bounces off a normal screen edge.
* cornerHitSound (AudioClip): Played when any DVD logo hits a 2-wall corner (5x payout).
* directHitSound (AudioClip): Played when clicking directly on the DVD logo with the Remote.
* recombinePopSound (AudioClip): Played when two split Mitosis logos recombine into one.
* grabShakeSound (AudioClip): Played on shake ticks when using the Telekinetic Grabber Remote.

1.2 TVFocusController (Hierarchy: DVDSetup)

* focusAudioSource (AudioSource): Speaker for Remote/Towel pickup and Pinball Bumper SFX.
* pickUpSound (AudioClip): Played when picking up the Remote or Towel from the desk.
* putDownSound (AudioClip): Played when putting the Remote or Towel back down.
* bumperSpawnSound (AudioClip): Played when clicking empty screen space to place a Pinball Bumper.
* bumperPingSound (AudioClip): Played when a DVD logo ricochets off a Pinball Bumper.
* grabStartSound / grabShakeTickSound / grabReleaseSound (AudioClip): Telekinetic Grabber SFX.

1.3 TVMinigameController (Hierarchy: DVDSetup)

* audioSource (AudioSource): Speaker for all 6 Remote Minigames.
* minigameSoundVolume (0..2, default 0.9): Master volume multiplier for minigame SFX.
* jumpSound (AudioClip): Dino Runner jump hop, Suika piece drop, and Tower Stack block drop.
* enemyPassSound (AudioClip): Dino Runner chime when safely clearing a cactus or flying bird.
* damageHitSound (AudioClip): Played on damage/loss in Dino, Pong, Suika, Tower, Fish & Block Blast.
* pongPaddleHitSound (AudioClip): One-Sided Pong sound when defending the logo with the paddle bar.
* suikaMergeSound (AudioClip): Suika Merger sound when two same-size logos combine.
* towerLandSound (AudioClip): Tower Stack sound when a falling block lands safely on the stack.
* fishEatSound (AudioClip): Fish Frenzy sound when eating a smaller swimming DVD logo.
* blockBlastPlaceSound (AudioClip): Block Blast sound when placing a polyomino shape onto the grid.
* blockBlastClearSound (AudioClip): Block Blast combo sound when full rows or columns blast apart.

1.4 TVScreenCleaner & TVScreenHazard (Hierarchy: DVDSetup)

* TVScreenCleaner -> wipeRubSound (AudioClip): Scrubbing sound while wiping dust with the Towel.
* TVScreenCleaner -> cleanChimeSound (AudioClip): Sparkle chime when the TV screen reaches 100% clean.
* TVScreenHazard -> slapImpactSound (AudioClip): Heavy thud when clicking 'Hit TV' on the TV casing.
* TVScreenHazard -> staticNoiseSound (AudioClip): Looping static noise during a TV static malfunction.
* TVScreenHazard -> staticLoopAudioSource (AudioSource): Dedicated child object DVDSetup/StaticNoiseAudio.

1.5 UpgradeManager & WorldSpaceUpgradeMenu (Hierarchy: DVDSetup & DVDPLAYERMANAGER/Canvas)

* UpgradeManager -> upgradePaths[i].staticSoundEffect (AudioClip): Static burst when switching DVDs.
* UpgradeManager -> upgradePaths[1].tiers[i].dvdMusic (AudioClip): Music track for each DVD Pile tier.
* WorldSpaceUpgradeMenu -> openMenuSound / closeMenuSound (AudioClip): Menu open & close SFX.
* WorldSpaceUpgradeMenu -> cycleItemSound (AudioClip): Next/Prev button click & Tab switch SFX.
* WorldSpaceUpgradeMenu -> buyUpgradeSound / equipUpgradeSound / errorSound (AudioClip): Purchase SFX.

1.6 Room Interactions, Survival Bars, Bills & Boosters

* GridCrawlerController (Player) -> stepSounds[] (AudioClip[]): Footstep sounds when moving/turning.
* BarManager (GameManagers) -> eatSound, sleepSound, toiletSound, showerSound, trashSound (AudioClip).
* BillManager (GameManagers) -> billArrivalSound, billPaySound, billPenaltySound (AudioClip).
* PermanentBoosterItem (permanentBoosterObjects/*) -> buildupSound, buySound, cantAffordSound.
* PauseManager (PauseCanvas) -> musicVolumeSlider, sfxVolumeSlider (Global audio mixer/volume sliders).

2. MODELS, PREFABS, MATERIALS, COLORS, VIDEOS & PARTICLES

Where to swap 3D models, prefabs, materials, videos, and particle effects across the project:

2.1 DVD Logo 3D Model, Two-Tone Materials & Circular Hit Particles

* Hierarchy: DVDSetup/Camera/DVDLogo (3D mesh child: 'dvd' and 'dvd/Torus').
* Two-Tone Logo Materials: 'dvd' uses the primary material; 'dvd/Torus' uses the secondary ring material.
* DVDLogoBouncer -> hitSparkColor (Color): Fallback spark tint (particles automatically sample both
* 'dvd' and 'dvd/Torus' colors so every burst spawns circular two-tone particles!).
* DVDLogoBouncer -> hitParticleBurstCount (int, default 20): Number of circular particles per hit.
* DVDLogoBouncer -> edgeEffectTemplate / cornerEffectTemplate: Optional custom particle templates.
* DVDLogoBouncer -> moneyPopupPrefab / negativeMoneyPopupPrefab: Floating +$ / -$ UI popup prefabs.

2.2 All 11 Remote Desk Models, Preview Prefabs & Reticle / Bumper Visuals

* Desk Remote Models: Hierarchy -> interactables/remote/RemoteControlTV (Tier 0) through
* RemoteControlTV_Tier10 (Tiers 1..10). Materials live in Assets/3DAssets/remote/Remote_Tier0..10.mat.
* Upgrade Preview Prefabs: Assets/Prefabs/remote_tier0.prefab through remote_tier10.prefab.
* TVFocusController (DVDSetup) -> screenReticleScale (default 0.22) & screenReticleColor (In-screen cursor).
* TVFocusController (DVDSetup) -> customBumperPrefab (GameObject): Optional custom 3D Pinball Bumper prefab.
* TVFocusController (DVDSetup) -> bumperColor (Color) & bumperOrthoRadius (float, default 0.55).

2.3 All 11 DVD Player & 11 DVD Pile Models, Prefabs, Videos & Logo Materials

* UpgradeManager (DVDSetup) -> upgradePaths[0] (Player Path, 11 Tiers 0..10):
* - worldGameObject: Scene objects playerbasic, playerbasic 1 .. playerbasic 10.
* - previewPrefab: Assets/Prefabs/playerbasic.prefab .. playerbasic 10.prefab.
* - Base Materials: Assets/3DAssets/DVDPlayer/Base 2.mat .. Base_10_Platinum.mat.
* UpgradeManager (DVDSetup) -> upgradePaths[1] (DVD Pile Path, 11 Tiers 0..10):
* - previewPrefab: Assets/Prefabs/dvdv.prefab .. dvdv 10.prefab.
* - dvdVideoFileName (string): StreamingAssets .mp4 filename played on DVDSetup/Camera/bgvideo.
* - logoMaterial (Material): Assets/materials/EMMISSIVES 1.mat .. EMMISSIVES_10_Platinum.mat.

2.4 Towel Model, High-Res Dust Overlay Quad & Static Video Malfunction

* Desk Towel Object: Hierarchy -> interactables/towel (Visual child: TowelVisual).
* TVFocusController (DVDSetup) -> towelHoverScale (Vector3, default 0.85, 0.85, 0.85).
* TVFocusController (DVDSetup) -> towelHoverRotationOffset (Vector3, default 0, 0, 0 = 90 deg upright).
* TVFocusController (DVDSetup) -> towelHoverSurfaceOffset (0.025) & towelPressDepthOffset (-0.012).
* TVScreenCleaner (DVDSetup) -> dustTextureResolution (int, default 512) & dustTintColor (Color).
* TVScreenCleaner (DVDSetup) -> overlayFrontOffset (float, default 0.0012 in front of TV glass).
* TVScreenHazard (DVDSetup) -> staticVideoFileName ('static.mp4' on DVDSetup/Camera/bgvideo).
* TVScreenHazard (DVDSetup) -> staticVideoFullAlpha (float, default 1.0 = full opacity during static).

2.5 Minigame Custom Prefabs, Colors & Red Screen Flash (TVMinigameController on DVDSetup)

* Dino Runner Models: customGroundObstaclePrefab & customBirdObstaclePrefab (leave empty for primitives).
* Dino Runner Scales & Colors: groundObstacleScale, birdObstacleScale, groundObstacleColor, birdObstacleColor.
* One-Sided Pong Model: customPongPaddlePrefab, pongPaddleWidth (2.45), pongPaddleHeight (0.28), pongPaddleColor.
* Suika Merger Tiers: suikaTierScales[8], suikaTierPrimaryColors[8], suikaTierSecondaryColors[8].
* Tower Stack Shapes: TowerShapes[6] in TVMinigameController.cs (ClassicBrick, WidePlank, TallPillar,
* HeavyMega, TrapezoidWedge, SkewedSlant) - each deforms the 2-part DVDLogo mesh & sets 2 colors.
* Block Blast Grid: blockBlastGridCols (8), blockBlastGridRows (8), blockBlastGhostAlpha (0.54).
* Red Screen Flash (All Minigames): screenRedFlashColor, screenRedFlashMaxAlpha (0.42, semi-transparent).

3. ANIMATION SPEEDS, SQUASH/STRETCH, CAMERA & MINIGAME PHYSICS

Where to fine-tune every animation speed, squash/stretch curve, camera zoom, and minigame physics value:

3.1 DVD Logo Directional Squash & Stretch + Movement Speeds (DVDLogoBouncer)

* baseSpeed (float, default 3.5): Base movement speed of the DVD logo in orthographic screen units/sec.
* directHitImpulseSpeed (float, default 9.5): Instant bonus speed added when clicking the logo.
* bounceImpulseRetention (0..1, default 0.72): Fraction of impulse speed kept after each wall bounce.
* impulseContinuousDrag (float, default 1.2): Smooth continuous deceleration of impulse speed.
* squashStretchDuration (float, default 0.55s): Duration of the fluid directional squash & stretch wave.
* maxSquashAmount (0.05..0.55, default 0.24): Peak deformation intensity on direct hits.
* wallBounceSquashMultiplier (0.2..1.2, default 0.78): Relative squash strength on regular wall bounces.
* squashOscillations (float, default 2.0) & squashDamping (float, default 2.6): Elastic spring feel.
* visualBounceDuration (float, default 0.15s), edgeBounceMultiplier (1.05), cornerBounceMultiplier (1.15).
* splitRecombineGracePeriod (float, default 2.0s): Seconds before split Mitosis logos can recombine.

3.2 TV Focus Zoom, Towel Scrub Tilt & Camera Follow (TVFocusController & SmoothCameraFollow)

* TVFocusController -> focusDistanceFromScreen (float, default 0.69): Distance from TV glass when zoomed.
* TVFocusController -> focusFieldOfView (float, default 38): Camera FOV in TV Focus Mode (~88% screen fill).
* TVFocusController -> focusFramingOffset (Vector2, default 0, 0): Fine-tune horizontal/vertical framing.
* TVFocusController -> towelHoverFollowSpeed (22) & towelScrubTiltAmount (14): Towel scrub animation feel.
* SmoothCameraFollow (Main Camera) -> focusTransitionSpeed (float, default 7.5): Zoom-in/out lerp speed.
* GridCrawlerController (Player) -> moveSpeed, rotateSpeed: First-person grid movement & turn speeds.

3.3 TV Slap Jiggle & Upgrade Menu Transitions (TVScreenHazard & WorldSpaceUpgradeMenu)

* TVScreenHazard (DVDSetup) -> slapJiggleDuration (0.42s): Duration of the top-down TV casing squish.
* TVScreenHazard (DVDSetup) -> slapSquashScale (Vector3: 1.14, 0.82, 1.10): Wide X/Z & compressed Y.
* TVScreenHazard (DVDSetup) -> centerSquishOnScreen (bool, default true): Keeps squish centered on screen.
* UpgradeManager (DVDSetup) -> worldModelShrinkSpeed (float, default 0.5): Pop-in/shrink speed on purchase.
* WorldSpaceUpgradeMenu (DVDPLAYERMANAGER/Canvas) -> previewSpinSpeed: Rotation speed of 3D preview model.

3.4 All 6 Remote Minigames - Speeds & Physics (TVMinigameController on DVDSetup)

* Minigame 1 - Dino & Bird Runner (Remote Tier 4):
* - dinoJumpVelocity (12.8), dinoGravity (30.0), dinoObstacleSpeed (5.6).
* - dinoJumpSquashIntensity (0.12), dinoLandSquashIntensity (0.10), dinoDamageSquashIntensity (0.24).
* - dinoSpawnIntervalRange (1.15s..2.15s), birdSpawnChance (0.42).
* Minigame 2 - One-Sided Pong (Remote Tier 5):
* - pongPaddleFollowSpeed (28.0), pongPaddleOffsetFromBottom (0.72).
* Minigame 3 - Suika Logo Merger (Remote Tier 6):
* - suikaGravity (18.5), suikaDropCooldown (0.36s), suikaRestitution (0.22), suikaOverflowGraceTime (0.95s).
* Minigame 4 - Tower Stack / Deform Tetris (Remote Tier 7):
* - towerTopSwingSpeed (5.2), towerDropGravity (26.0), towerScrollTriggerHeightRatio (0.45).
* - towerScrollLerpSpeed (6.5), towerToppleDuration (1.55s), towerBalanceForgiveness (0.92).
* Minigame 5 - Fish Frenzy / Eat Smaller Logos (Remote Tier 8):
* - fishInitialPlayerSize (0.44), fishPlayerFollowSpeed (14.5), fishMaxActiveNpcCount (11).
* - fishSpawnIntervalRange (0.45s..0.95s), fishSwimSpeedRange (1.8..4.2), fishGrowthPerEatFactor (0.16).
* - fishRedFlashDuration (0.40s) + fishPostFlashLockDuration (0.50s wait before controlling eating fish).
* Minigame 6 - Block Blast DVD Grid (Remote Tier 9):
* - blockBlastGridCols (8), blockBlastGridRows (8), blockBlastShatterDuration (0.68s).
* Shared Red Screen Flash (All Minigames): screenRedFlashDuration (0.38s), screenRedFlashMaxAlpha (0.42).

4. BOOSTERS, UPGRADES (11 TIERS EACH), ECONOMY & SURVIVAL VALUES

Every upgrade tier (1 Starter + 10 Upgrades per category), booster item, reward multiplier, and hazard:

4.1 Core DVD Bouncer Economy & Minigame Rewards/Penalties (DVDLogoBouncer)

* startingMoney (float) & edgeReward (float): Base cash earned per wall bounce (CornerHitValue = 5x Edge).
* directHitBonusMultiplier (float, default 1.5): Direct click payout multiplier.
* Minigame Payouts & Penalties (all scale automatically with CornerHitValue):
* - Dino Runner: +1x Corner per passed enemy (no particles); -3x Corner + Red Flash on obstacle hit.
* - One-Sided Pong: +1x Corner per paddle save; -3x Corner + Red Flash on bottom wall miss.
* - Suika Merger: Exponential +CornerHitValue * 2^tier on every merge; Red Flash + board reset on overflow.
* - Tower Stack: +1x Corner per stacked block; -3x Corner + Red Flash + full-tower shrink topple on fall.
* - Fish Frenzy: +Corner * (eatenFishSize / startSize) per eat; -10x Corner + Red Flash when eaten.
* - Block Blast: +1x Corner per shape placed, +(lines^2 * 3)x Corner on line blast; -3x Corner on reset.

4.2 Upgrade Path 0: DVD PLAYERS (SpeedMultiplier - 1 Starter + 10 Upgrades = 11 Tiers)

Configured in UpgradeManager.upgradePaths[0] (and SetupDvdAndBoosters.cs):

* Tier 0 (Starter): Dumpster Sanyo ($0, 1.00x Speed) | Tier 1: Pawnshop Apex ($12, 1.40x Speed)
* Tier 2: Taped Magnavox ($38, 1.90x) | Tier 3: Overclocked Deck ($90, 2.60x, +45% Hunger)
* Tier 4: Repo'd Trinitron ($250, 3.50x, +55% Sleep) | Tier 5: Smoking Turbo ($500, 4.70x, +60% Depress.)
* Tier 6: Landlord Bribe ($950, 6.20x, +70% Toilet) | Tier 7: Gold Panasonic ($2500, 8.00x, +65% EatDirt)
* Tier 8: Bootleg Monolith ($4500, 10.5x, +80% Infl.) | Tier 9: Doom Accelerator ($8000, 14.0x, +100% Pen.)
* Tier 10: Quantum Singularity Deck ($15000, 18.50x Speed, +110% Depression Fill Rate)

4.3 Upgrade Path 1: DVD PILE (MoneyMultiplier - 1 Starter + 10 Upgrades = 11 Tiers)

Configured in UpgradeManager.upgradePaths[1] (and SetupDvdAndBoosters.cs):

* Tier 0 (Starter): Sharpie CDR ($0, 1x Cash) | Tier 1: Bargain Kung-Fu ($15, 5x Cash)
* Tier 2: Mortgage Seminar ($45, 15x) | Tier 3: Psychic Hotline ($110, 40x, +45% Sleep)
* Tier 4: Dashcam Cheaters ($300, 100x, +55% Hunger) | Tier 5: Depressed Fishing ($600, 250x, +65% Depr.)
* Tier 6: Banned Commercials ($1150, 600x, +75% Trsh) | Tier 7: Foreclosure Tour ($3200, 1500x, +60% Food)
* Tier 8: Warehouse Bootleg ($5800, 3500x, -50% Slp) | Tier 9: Executive Severance ($10000, 10000x)
* Tier 10: Lost Studio Master ($20000, 25000x Cash, +95% Inflation Rate)

4.4 Upgrade Path 2: REMOTES (RemoteUpgrade - 1 Starter + 10 Upgrades = 11 Tiers)

Configured in UpgradeManager.upgradePaths[2] (and SetupGameplayOverhaul.cs):

* Tier 0 (Starter): Stock Clicker ($0) - Direct Impulse Hit + Bonus Cash + Squash/Stretch
* Tier 1 (Upgrade 1): Mitosis Splitter ($85) - Splits Logo into 2x Children + Recombines on Collision
* Tier 2 (Upgrade 2): Telekinetic Grabber ($190) - Hold Logo & Drag Into Walls/Corners to Bounce
* Tier 3 (Upgrade 3): Pinball Bumper Pro ($320) - Click Empty Screen to Spawn up to 5 Bumpers
* Tier 4 (Upgrade 4): Dino Jump Remote ($420) - Minigame 1: No-Internet Dino & Bird Jumper
* Tier 5 (Upgrade 5): Pong Paddle Remote ($520) - Minigame 2: One-Sided Pong Bar Defender
* Tier 6 (Upgrade 6): Suika Merger Remote ($640) - Minigame 3: Suika Fruit Merger (Saves Board State)
* Tier 7 (Upgrade 7): Tower Stack Remote ($760) - Minigame 4: Deformed Logo Tower Stacker
* Tier 8 (Upgrade 8): Fish Frenzy Remote ($880) - Minigame 5: Eat Smaller Logos & Endless Zoom-Out
* Tier 9 (Upgrade 9): Block Blast Remote ($1020) - Minigame 6: Full-Screen 8x8 Square DVD Block Blast
* Tier 10 (Upgrade 10): Omni-Remote 9000 ($1250) - ULTIMATE: Direct Hit + Mitosis + Pinball Bumpers!

4.5 Dust Debuff, Static Malfunction, Survival Bars, Bills & 19 Shelf Boosters

* TVScreenCleaner (DVDSetup): fullDirtAccumulationSeconds (180s), maxDustSpeedDebuff (0.50 = -50% speed).
* TVScreenHazard (DVDSetup): minSecondsBetweenStatic (75s), maxSecondsBetweenStatic (140s),
* staticChancePerRoll (0.65). Tactical Slap when logo is in top 20% hammers it down for +2x EdgeCash!
* BarManager & BillManager (GameManagers): Adjust Hunger, Sleep, Depression, Dirtiness rates & Bill timers.
* Permanent Shelf Boosters: Hierarchy -> permanentBoosterObjects/* (19 items with PermanentBoosterItem
* + BoosterObject components; edit itemName, cost, description, and StatModifier values in Inspector).
